Our company deal by making risk analysis for our project companies that provide more secure and safe. When we pay attention to risk analysis issues; Electronic security transaxle? Company wants the number of security staff enough? Have sufficient number of cameras? Such substances, based company internal and external input - output field by controlling the taken photos of risk analysis are preparing and accordingly task distribution scheme by creating a more efficient staff kuruyoruz.dah then this risk analysis an assessment to prepare proposals for solutions elongation by those outcomes, the company are forwarded to the authorities. Altai security firm have given positive transformation of every project we take our quality but also with certificates of appreciation and corporate identity have been put forth my.
